

Carlos Armando Salinas Montes

He is an Industrial Engineer with Master's Degrees in Economics (MA) and Management (MBA) from the Boston University. He also holds a specialization in Environmental Quality Management.

He is the Administrative Director of the Amazon Cooperation Treaty Organization (ACTO), and he is also responsible for Forest issues within the Organization

During his career he has worked in the private, public and international sectors, all of them in the environmental field and in particular in forestry.

He has broad experience in multilateral agreements; negotiations in international forums; management and design of public policies; formulation, implementation and development of programs and/or projects at national and/or regional level. In addition, he has led multidisciplinary teams in public or private institutions, and has mastered technical-administrative procedures, financial management and budget management.

His latest works has been related to the Amazon Cooperation Treaty Organization (ACTO) as the Regional Coordinator of the Biodiversity Program (IDB 2006 -2010); as well as with the Deforestation Monitoring Project (ITTO -BMZ/DGIS -FA/BNDES 2011 -2018).
